EDUCATION

Bachelor of Engineering, *Bharati Vidyapeeth college of Engineering* 06/2021 – 06/2025

Higher Secondary Education, *Seth Vidya Mandir* 05/2020 – 05/2021

SKILLS

- Agentic AI
- Retrieval-Augmented Generation (RAG)
- Large Language Models (LLMs)
- LangGraph
- Prompt Engineering

PROJECT

Autonomous Customs Intelligence Platform (ACIP), *CDAC Final project* 07/2026

- Developed an **AI-powered multi-agent customs compliance platform** that automates customs document processing, reducing manual effort, data entry errors, and regulatory compliance risks.
- Built an end-to-end workflow for **OCR-based document extraction, validation, RAG-powered compliance checking, customs duty calculation, and Bill of Entry generation** with Human-in-the-Loop (HITL) review.
- Implemented a **LangGraph-based agentic architecture** with specialized AI agents for OCR, validation, compliance reasoning, report generation, and workflow orchestration, ensuring explainable and auditable decisions.
- Leveraged **Retrieval-Augmented Generation (RAG)** with a regulatory knowledge base to retrieve CBIC/DGFT notifications and generate accurate, citation-backed customs compliance assessments.
- **Technologies:** Python, FastAPI, React.js, LangGraph, OpenAI GPT-5.5/ ollama, Docling, PostgreSQL, pgvector.

SpeakX-Pro — AI-Powered Public Speaking Intelligence Platform 06/2026

- **Developed** a **100% local AI-powered public speaking coach** that analyzes **audio, video, and NLP** data, extracting **18+ communication metrics** to generate personalized coaching reports.
- **Integrated Whisper, MediaPipe, and Qwen2.5-7B (Ollama)** to perform speech transcription, eye-contact detection, posture analysis, grammar evaluation, and AI-driven feedback **without cloud APIs**.
- **Engineered** a **RAG-powered chatbot** using **ChromaDB, Sentence-Transformers, and SQLite** to retrieve previous speaking sessions and visualize progress across **analyzed videos**.

SANNIDHI — Intelligent Classroom Attendance System 05/2026

- **Engineered** an **AI-powered face recognition attendance system** that automatically detects and identifies students from a **single classroom image**, eliminating manual attendance and enabling **instant attendance generation**.
- **Implemented InsightFace (RetinaFace & ArcFace)** to generate **512-dimensional facial embeddings**, enabling **scalable student enrollment without retraining** while maintaining high recognition accuracy.
- **Developed** a **Streamlit-based attendance dashboard** with **SQLite**, automated image/video enrollment, dynamic image scaling, and **cosine similarity matching** for reliable recognition in crowded classroom environments.

AWARD

2nd Prize – E-Cell Pitch Competition, *Bharati Vidyapeeth College of Engineering, Navi Mumbai*
Pitched InCampus, a platform for students to post opportunities and collaborate within the campus.

National-Level Hackathon Finalist – Top 10 in HackOverflow 2.0, *Pillai College of Engineering*
Presented the Nyayak project at the event.
